Subject Index of Volume 140

Abrasion
the resistance of nickel and iron aluminides to cavitation erosion and abrasive wear, 279
Acetophenone
modification of the surface of cross-linked oligophenylene based on 4,4′-diacetyldiphenyloxide and acetophenone by IR laser radiation, 263
Alloys
a metallographic study on the subsurface zones of high carbon Cr–Ti alloy steel worn by rolling contact, 119
scale behavior in erosion–corrosion of low alloy steels, 309
the effect of lead content on the wear characteristics of a stir-cast Al–Pb alloy, 83
the microstructure and galling wear of a laser-melted cobalt-base hardfacing alloy, 223
Aluminium
the wear properties of an SiC-whisker-reinforced aluminium composite, 273

Brass
mutual transfer of materials for dry sliding of brass against stainless steel, 207
Bronze
coolant contamination of sintered bronze parts, 165

Cadmium
determination of zinc and calcium in multigrade crankcase oils, 49
Carbon
the wear properties of an SiC-whisker-reinforced aluminium composite, 273
tribology of silicon-thin-film-coated SiC ceramics and the effects of high energy ion irradiation, 251
Cavitation erosion
correlation of cavitation erosion behavior with mechanical properties of metals, 63
the resistance of nickel and iron aluminides to cavitation erosion and abrasive wear, 279
Ceramics
mechanism of transfer film formation during repeat pass sliding of ceramic materials, 191
on a mechanism of lubrication by adsorbed gases, 149
tribology of silicon-thin-film-coated SiC ceramics and the effects of high energy ion irradiation, 251
Characterization
chemical structure characterization of the boundary lubrication film using X-ray photoelectron spectroscopy and scanning Auger microphobe techniques, 345
Chemical structure
chemical structure characterization of the boundary lubrication film using X-ray photoelectron spectroscopy and scanning Auger microphobe techniques, 345
Cobalt
the microstructure and galling wear of a laser-melted cobalt-base hardfacing alloy, 223
Composites
the wear properties of an SiC-whisker-reinforced aluminium composite, 273
Concentration effects
abrasive concentration effects on wear under reciprocating conditions, 359
Contamination
coolant contamination of sintered bronze parts, 165
Corrosion
scale behavior in erosion–corrosion of low alloy steels, 309
the synergistic effect of erosion and corrosion: trends in published results, 387
Cross-linked oligophenylene
modification of the surface of cross-linked oligophenylene based on 4,4′-

Elsevier Sequoia/Printed in The Netherlands

diacetyldiphenyloxide and acetophenone by IR laser radiation, 263
Cyclic deformation
correlation of cavitation erosion behavior with mechanical properties of metals, 63
the simulation of sliding wear by cyclic deformation: microstructural aspects, 93

4,4′-Diacetyldiphenyloxide
modification of the surface of cross-linked oligophenylene based on 4,4′-diacetyldiphenyloxide and acetophenone by IR laser radiation, 263
Dominant erosion micromechanism
erosion efficiency — a new parameter to characterize the dominant erosion micromechanism, 369
Dry sliding
mutual transfer of materials for dry sliding of brass against stainless steel, 206

Elastohydrodynamic lubrication
numerical analysis of elastohydrodynamic squeeze film lubrication of total hip prostheses, 1
the elastohydrodynamic lubrication of line contacts with pseudoplastic fluids, 235
Erosion
design of a slurry erosion test rig, 331
scale behavior in erosion–corrosion of low alloy steels, 309
the resistance of nickel and iron aluminides to cavitation erosion and abrasive wear, 279
the synergistic effect of erosion and corrosion: trends in published results, 387
Erosion efficiency
erosion efficiency — a new parameter to characterize the dominant erosion micromechanism, 369
Exoelectron
in situ metal transfer monitoring using photostimulated exoelectron emission, 175

Failure
coolant contamination of sintered bronze parts, 165
Fatigue
correlation of cavitation erosion behavior with mechanical properties of metals, 63
the study of scuffing and pitting failure of cam-tappet rubbing pair, 135
Fluid film
numerical analysis of elastohydrodynamic squeeze film lubrication of total hip prostheses, 1
Friction
on a mechanism of lubrication by adsorbed gases, 149
the effect of abnormal superconductor friction, 39

Galling wear
the microstructure and galling wear of a laser-melted cobalt-base hardfacing alloy, 223

Infinite–asperity model
effect of lateral tension and compression on plane strain flattening processes of surface asperities lying over a plastically deformable bulk, 17
Ion irradiation
tribology of silicon-thin-film-coated SiC ceramics and the effects of high energy ion irradiation, 251
IR laser radiation
modification of the surface of cross-linked oligophenylene based on 4,4′-diacetyldiphenyloxide and acetophenone by IR laser radiation, 263
Iron
the resistance of nickel and iron aluminides to cavitation erosion and abrasive wear, 279

Lead
the effect of lead content on the wear characteristics of a stir-cast Al–Pb alloy, 83
Line contacts
the elastohydrodynamic lubrication of line contacts with pseudoplastic fluids, 235
Low alloy steels
scale behavior in erosion–corrosion of low alloy steels, 309
Lubrication
chemical structure characterization of the boundary lubrication film using X-ray photoelectron spectroscopy

and scanning Auger microphobe techniques, 345
on a mechanism of lubrication by adsorbed gases, 149

Microstructure
the microstructure and galling wear of a laser-melted cobalt-base hardfacing alloy, 223
Morgan–Cameron approximation
a note on the Morgan–Cameron approximation, 383
Multidisc brakes
analysis of thermomechanical phenomena in multidisc clutches and brakes, 291
Multidisc clutches
analysis of thermomechanical phenomena in multidisc clutches and brakes, 291

Nickel
the resistance of nickel and iron aluminides to cavitation erosion and abrasive wear, 279

Photostimulation
in situ metal transfer monitoring using photostimulated exoelectron emission, 175
Pitting
the study of scuffing and pitting failure of cam-tappet rubbing pair, 135
Plasticity
effect of lateral tension and compression on plane strain flattening processes of surface asperities lying over a plastically deformable bulk, 17
Pseudoplastic fluids
the elastohydrodynamic lubrication of line contacts with pseudoplastic fluids, 235

Reciprocating conditions
abrasive concentration effects on wear under reciprocating conditions, 359
Repeat pass sliding
mechanism of transfer film formation during repeat pass sliding of ceramic materials, 191
Resistance
the resistance of nickel and iron aluminides to cavitation erosion and abrasive wear, 279
Rolling
a metallographic study on the subsurface zones of high carbon Cr–Ti alloy steel worn by rolling contact, 119

Scale behavior
scale behavior in erosion–corrosion of low alloy steels, 309
Scanning Auger microprobe
chemical structure characterization of the boundary lubrication film using X-ray photoelectron spectroscopy and scanning Auger microphobe techniques, 345
Scuffing
the study of scuffing and pitting failure of cam-tappet rubbing pair, 135
Silicon
the wear properties of an SiC-whisker-reinforced aluminium composite, 273
tribology of silicon-thin-film-coated SiC ceramics and the effects of high energy ion irradiation, 251
Sliding wear
the simulation of sliding wear by cyclic deformation: microstructural aspects, 93
Slurry erosion
design of a slurry erosion test rig, 331
Stainless steel
mutual transfer of materials for dry sliding of brass against stainless steel, 207
Steels
a metallographic study on the subsurface zones of high carbon Cr–Ti alloy steel worn by rolling contact, 119
scale behavior in erosion–corrosion of low alloy steels, 309
Superconductors
the effect of abnormal superconductor friction, 39
Syalon
characterization of contact damage of Syalon in contact with Waspaloy, 107
Synergistic effect
the synergistic effect of erosion and corrosion: trends in published results, 387

Test rigs
design of a slurry erosion test rig, 331

Thermomechanical phenomena
analysis of thermomechanical phenomena in multidisc clutches and brakes, 291
Thin films
tribology of silicon-thin-film-coated SiC ceramics and the effects of high energy ion irradiation, 251
Three-dimensional elasticity
numerical analysis of elastohydrodynamic squeeze film lubrication of total hip prostheses, 1
Transfer film formation
mechanism of transfer film formation during repeat pass sliding of ceramic materials, 191
Tribology
tribology of silicon-thin-film-coated SiC ceramics and the effects of high energy ion irradiation, 251

Viscosity index
determination of zinc and calcium in multigrade crankcase oils, 49

Waspaloy
characterization of contact damage of Syalon in contact with Waspaloy, 107
Wear
abrasive concentration effects on wear under reciprocating conditions, 359
the effect of lead content on the wear characteristics of a stir-cast Al–Pb alloy, 83
the wear properties of an SiC-whisker-reinforced aluminium composite, 273
Wear damage
characterization of contact damage of Syalon in contact with Waspaloy, 107
Wear properties
the wear properties of an SiC-whisker-reinforced aluminium composite, 273
Wear resistance
a metallographic study on the subsurface zones of high carbon Cr–Ti alloy steel worn by rolling contact, 119

X-ray photoelectron spectroscopy
chemical structure characterization of the boundary lubrication film using X-ray photoelectron spectroscopy and scanning Auger microphobe techniques, 345

Zinc
determination of zinc and calcium in multigrade crankcase oils, 49
